

Citizen proposal

November 16, 2010, resubmitted April 25, 2012:

This is to let you know that I would like to nominate whenever the opportunity arises, the Class C segment of Limestone Stream (below Long Road) to B. (DEP staff) confirmed a couple of years ago it was attaining B even with the small STP upstream. That treatment plant will be or has been closed, with wastewater piped to the plant at Loring Development Authority.
