Augusta, Maine 04333-0017

SUBJECT: Notification of Approval of Trafton Lake TMDL

Dear Mr. Fisk:

Thank you for Maine's submittal of the Trafton Lake Total Maximum Daily Load (TMDL) for total phosphorus. This waterbody is included on Maine's 2004 303(d) list and was prioritized for TMDL development. The purpose of the TMDL is to address impaired primary contact recreational use from algae blooms due to excessive nutrient loading from nonpoint source pollution, primarily due to runoff from surrounding agricultural land in the watershed.

The U.S. Environmental Protection Agency (EPA) hereby approves Maine's October 13, 2006 Trafton Lake TMDL received by EPA electronically. EPA has determined that this TMDL meets the requirements of §303(d) of the Clean Water Act (CWA), and of EPA's implementing regulations (40 CFR Part 130). Attached is a copy of our approval documentation.

We are pleased with the quality of your TMDL submittal. Your staff, in collaboration with the Maine Association of Conservation Districts, has done an excellent job of preparing and ground-truthing a comprehensive and informative TMDL report. My staff and I look forward to continued cooperation with the ME DEP in exercising our shared responsibility of implementing the requirements under Section 303(d) of the CWA.

Sincerely,

Linda M. Murphy, Director
Office of Ecosystem Protection
